

# Water in Santa Cruz County: The Big Picture

## Directions

Watersheds are the area of land where water drains. Watersheds are labeled at the top of each colored land area.

1. Find the town or city you live in and write the name of your watershed. \_\_\_\_\_

These symbols   indicate the source of water for your town (not the location of the well or river intake).  
Find your town or city and circle your local water source. Groundwater Surface Water Both

These symbols indicate the source of water for your town (not the location of the well or river intake)

					
Groundwater	Surface Water	Drinking Water Treatment Plant	Wastewater Treatment Plant	Wastewater Recycling	Harkins Slough Recharge Facility

Water sources indicate only large and known water systems and do not include small or private water systems.  
If you have a well at your house, what is your water source? Groundwater or surface water? \_\_\_\_\_

Map not to scale. Towns and landmark locations are generalized. For educational purposes only.
