

Co-Creating Water Neutral Gardens

Upcoming Garden Tour

Saving Every Drop **Sunday, June 2, 1:00–3:00 p.m.**

Robin Spring and Michael Lejarza are committed to using every drop of available water to nourish the plants in their beautiful garden in Watsonville. Love's Gardens came in to help design and install a system to help with that. The results? A rainwater catchment system with two tanks, pump, and filters that waters their veggies with rainwater through the existing drip irrigation, and uses the overflow to water the ornamentals.

This lovely, well-maintained garden focuses on drought-tolerant and Mediterranean plants. Stop by anytime between 1:00 and 3:00 for a self-guided tour. Or come for one of the tours we are leading at 1:15 and 2:15. There will also be organic snacks and a free raffle.
